

Comodo Premium Wildcard SSL Certificates

COMODO
Creating Trust Online®

Provide a Secure e-Commerce Environment to all sub-domains

Save time and money by consolidating your SSL certificate management. If you have one top level domain and multiple sub-domains, you can use a single SSL certificate to secure them all. Comodo's Premium SSL Wildcard certificate is easy to manage, while providing future-proof 2048-bit root keys.

How Premium Wildcard SSL Certificate Works

Comodo Premium Wildcard SSL Certificate works the same way as a regular SSL Certificate, allowing you to secure the connection between your website and your site visitor's browser – with one major advantage that a single Premium Wildcard SSL Certificate covers all of the sub-domains of your main domain. It provides a cost effective and efficient means of securing all your sub-domains without the need to manage multiple certificates.

For example a single Comodo Premium Wildcard SSL Certificate for *.yourdomain.com can be used for unlimited sub-domains you may have, such as the following:

- info.yourdomain.com
- products.yourdomain.com
- login.yourdomain.com
- catalogue.yourdomain.com
- download.yourdomain.com
- anything.yourdomain.com

A Comodo Premium Wildcard Certificate ensures that you need not worry about the technical efforts, cost and time involved in managing multiple Certificates on your server.
